Individual, flexible, premium

“Move” – the new organiser system

Even though increasing emphasis is being given to design and technology, the kitchen is and always will be the room where we prepare meals, keep cooking utensils and store food. Now Häcker Kitchens has developed “Move”, a new organiser system for drawer and cabinet interiors that ensures small items are easy to find and makes optimum use of the space available.

Order made easy

With “Move”, every pullout, every drawer and every wall unit from Häcker Kitchens can be individually equipped. And there are even solutions for certain kitchen utensils too, such as a special cutlery, knife or spice insert and a holder for rolls of cling film or foil.

Maximum flexibility

Made of real wood and metal, the boxes can be stacked on top of one another and repositioned to create a system within the system. This permits maximum flexibility and ensures “Move” more than lives up to its name.

Harmonious colours

The metal elements and non-slip liners are available in a choice of Champagne or Lava Grey. Customers who choose a kitchen from the systemat range can thus create a perfect tone-on-tone look behind the cabinet fronts, from the colour of the carcasses and wire pullouts all the way to the new “Move” organiser system.

About Häcker Kitchens

The owner-run family company Häcker has been manufacturing modern fitted kitchens at its site in Rödinghausen, east Westphalia – the home of the German kitchen furniture industry – since 1965. In 2014, more than 1,200 employees generated a turnover of 406 million euros, with exports currently accounting for around 38 percent of sales. The development of the company is characterised by continuous growth and future-oriented investment. Currently, more than 60 countries spread across all continents are supplied with “Made in Germany” kitchens. The specialised trade has two product lines available for the various market segments: classic and classicART for the entry level and systemat and systematART for the middle and upper price segments.
